### ANNUAL REPORT OF THE DIRECTOR.

#### 1900-1901.

#### To the Trustees of the Field Columbian Museum:

I have the honor to present the Report of the operations of the Museum for the year closing September 30, 1901. The expenses of the Museum under the head of maintenance have been in excess of the budget this year, but, as a matter of fact, the large amount of money that was expended for re-supporting the main floor, having been done under special instructions of the President, is not a proper charge against maintenance. If this fact is taken into consideration, the expenditures have been under the budget.

It would seem from the permanent improvements recorded each year that the building is gradually being reconstructed. This, as a matter of fact, is true as concerns the offices, laboratories, etc., but the growing needs of the Museum and the expanding processes necessary to meet the demand of the departments are but an index of the development of the entire Institution. More and more each year the Museum finds itself equipped to perform all the necessary labor; not only the technical and scientific labor, but the ordinary mechanical work as well, and the circumstances are unusual when outside agencies are employed.

The Institution has been honored by the visits of a great many officers and students of Museums at home and abroad, and there has been a universal reference to its advancement and approval of its methods. The Report in its detail will determine the healthy condition of the affairs of the Museum and will point to the extension of its investigations and influence into all fields within its scope and to all parts of the world. The improvements in installation, in accordance with the strictest scientific standard, is steadily in progress. Inappropriate and undesirable material is constantly disappearing to be supplanted by that which is nearer the standard, and the Museum is doing *Museum* work; while the laboratory and the study is not neglected, yet the fact that the Museum is dedicated to the enlightenment, instruction and in a measure to the entertainment of the public, is not ignored, and those things calculated to advance this policy are

those that most engage the attention of the officers of the Institution. As a natural consequence, the general appearance of the Museum is never the same, constant additions, changes and renewals, etc., making the exhibition halls always fresh and inviting.

STAFF OF THE MUBEUM. The following changes and additions in the Staff may be noted: Mr. Charles L. Owen was appointed Assistant Curator of Archaeology, and Mr. W. J. Gerhard Assistant Curator of Entomology. The services of Mr. J. W. Hudson as Field Ethnologist were secured, and Mr. Edmund Heller succeeded Mr. Surber as Collector of Mammals. Professor Merton L. Miller of the University of Chicago accepted an assignment to collect ethnological material for the Museum in the States of Washington and Oregon during the summer months, and the services of Mr. C. F. Newcombe were obtained to represent the Museum as Field Ethnologist in the Queen Charlotte Islands. The Executive Committee sanctioned during the year the appointment of an artist, and the services of Mr. Ernest St. John were secured.

INCOME AND MAINTENANCE. The budget authorized by the Executive Committee provided the sum of \$102,000.00 for the maintenance of the Museum for the year ending September 30, 1901. The amount expended was \$108,220,00, showing a balance in excess of the estimated expenses of \$6,220.00. In addition to this amount. \$52,325.00 was expended by authority of the Executive Committee for collections, expeditions, etc., bringing the total expenditure for the year to \$160,545.00. In explanation of the excess in maintenance, it should be borne in mind that the Executive Committee has during the year' increased the stipend of a number of individuals in the employ of the Museum and has also added several assistants to the working force. There is also a large increase this year in the amount expended for repairs and alterations to the building. While last year the amount spent for cases was \$10,180,00, this year the figures show \$21,505.00, an amount more than double. The Trustees having arrived at the conclusion that the Columbus Caravels were not in sympathy with the collections in the Museum, it was decided to dispose of them if possible, and with this end in view the Board of South Park Commissioners was approached, and they agreed to accept the title to these interesting objects, releasing the Museum from all hability, for a consideration of \$3,000.00.

THE MEMBERSHIPS.—There still has to be recorded a decrease in the annual memberships, due, as has been previously reported, to the fact that no effort is made to increase the list. LECTURE COURSES.—The usual two courses have been given, but unfortunately a decrease in the attendance has to be noted. This lack of interest may be accounted for by the fact that a casual review of the syllabuses would indicate by the titles of the lectures more technical discourses than had obtained in previous courses. Furthermore, the great increase in the number of lectures given by different institutions in Chicago has probably tended to diminish the interest in any course of free lectures. Following is a list of the lectures given during the year:

FOURTEENTH LECTURE COURSE.

Oct. 6.—"How Plants Live" (Illustrated).

Prof. Charles R. Barnes, University of Chicago.

Oct. 13.—"Do Invertebrates Have Consciousness?" (Illustrated).
Dr. H. V. Neal, Knox College, Galesburg, Ill.

Oct. 20.--" Wyandotte and Marengo Caves" (Illustrated).

Prof. O. C. Farrington, Curator, Department of Geology.

Oct. 27.—"The Life and Death of a Tree" (Illustrated).

Dr. Thomas H. Macbride, State University of Iowa.

Nov 3.—"Porto Rico and Its People" (Illustrated).

Dr. Barton W. Evermann, Ichthyologist of the United States Fish Commission.

Nov. 10.—"Mining in the Ozarks" (Illustrated).

Prof. H. W. Nichols, Assistant Curator Department of Geology, Field Columbian Museum.

Nov. 17.—" Variation of Organisms" (Illustrated).

Dr. C. B. Davenport, University of Chicago.

Nov. 24.—"Picturesque Mexico" (Illustrated).

Mr. P. V. Collins, Minneapolis, Minn.

FIFTEENTH LECTURE COURSE.

March 2.—"The Kiowa Indians—A Typical Buffalo Tribe" (Illustrated).

Mr. James Mooney, Bureau of Ethnology, Washington, D. C.

March 9.—"The Hills and Valleys of Wisconsin and Their Life History" (Illustrated).

Dr. E. R. Buckley, Wisconsin Geological and Natural History Survey.

M. Promonds of the Kettle Moraine and Their Ancestral Home" (Illustrated).

Prof. Wm. H. Hobbs, University of Wisconsin.

Maching "The Evolution of Means of Transportation in America" (Illinstrates).

Prof. Edwin Erle Sparks, University of Chicago.

Manager "Some Interesting Insects" (Illustrated).

Mr. E. B. Chope, Assistant in Department of Zoology.

April 6. "Deep Sea Fishing and Fishes" (Illustrated).
Dr. S. E. Meck, Assistant Curator Department of Zoology.

April 19 The Antonia Buddle of Americal Control of Ethnology, Washington, D. C.

April 20.-" Tour of the Plant World - West Indies" (Illustrated).

Dr. C. E. Milli, page 0. Courton Department of Botany.

April 27. "Jamaica The Princess of the Antilles" (Illustrated).

Dr. C. F. Mill, pagely, Governor Department of Botany.

Publications. This means of recording the results of original and the entacolloude meantwist of productions and production and production of the complimentary references made from time to time by prominent scientists and journals, the standard reached is very high. The Synopsis of the Mammals of North America and the Adjacent Seas I was issued during the year and the following excerpt from a review of the work by a prominent scientist may be of interest in connection with the typographical appearance which characterizes the Museum publications.

It is to a confidential, the order of paper that is probably ill-adapted to withstand constant use. This, however, was indicated a constant use of the promose indicates a cities which the text is illustrated. As if to compensate for the brevity of the text, the book is illustrated with a profuseness hitherto unknown in similar works. It is not said to a figure of intain that time reproductions of photocity and to all outside of actions of presentative of nearly every genus and sub-genus. The standing of excellence of these figures is very high, and no equally successful application of photography to zoological illustration on so extensive a scale has hitherto been made."

LARGE MALE IN GROUP OF STONE'S ALASKA BLACK SHEEP (OVIS STONE) - FIELD COLUMBIAN MUSEUM.

Oct. 1901.

· Below will be found titles of the publications issued since October 1st last, with the number of pages and illustrations:

- Pub. 45.—Zool. Ser., Vol. 2. "Synopsis of the Mammals of North America and the Adjacent Seas." By D. G. Elliot. 471 pp., edition 1,100, illustrations 143 (half-tones).
- Pub. 51.—An. Ser., Vol. 2, No. 4. "An Aboriginal Quartzite Quarry in Eastern Wyoming." By G. A. Dorsey. 13 pp., edition 1,000, illustrations 12 (half-tones).
- Pub. 52.—Report Ser., Vol. 1, No. 6. "Annual Report of the Director." 86 pp., edition 2,000, illustrations 14 (13 half-tones, 1 zinc etching).
- Pub. 53.—Geol. Ser., Vol. 1, No. 8. "Observations on Indiana Caves." By O. C. Farrington. 27 pp., edition 1,000, illustrations 11 (9 half-tones, 2 zinc etchings).
- Pub. 54.—Zool. Ser., Vol. 3, No. 3. "List of Mammals obtained by Thaddeus Surber, Collector for the Museum, in the Provinces of New Brunswick and Quebec, Canada." By D. G. Elliot. 17 pp., edition 1,000, no illustrations.
- Pub. .55.—An. Ser., Vol. 3, No. 1. "The Oraibi Soyal Ceremony."

  By G. A. Dorsey and H. R. Voth. 136 pp., edition 1,000, illustrations 37 (half-tones).
- Pub. 56.—An. Ser., Vol. 2, No. 5. "Archæological Investigations on the Island of La Plata, Ecuador." By G. A. Dorsey. 161 pp., edition 1,000, illustrations 72 (63 half-tones, 9 zinc etchings).
- Pub. 57.—Zool. Ser., Vol. 2, No. 2. "A List of the Land and Sea Mammals of North America, North of Mexico." Supplement to the Synopsis. By D. G. Elliot. 64 pp., edition 1,000, illustrations 7 (half-tones).
- Pub. 58.—Zool. Ser., Vol. 3, No. 4. "A List of Mammals obtained by Thaddeus Surber in North and South Carolina, Georgia, and Florida. By D. G. Elliot. 21 pp., edition 1,000, illustrations 6 (half-tones).
- Pub. 59.—Zool. Ser., Vol. 3, No. 5. "The Caribou of the Kenai Peninsula." By D. G. Elliot. 12 pp., edition 1,000, illustrations 3 (half-tones).

The distribution to foreign countries is still continued through the Bureau of International Exchanges of the Smithsonian Institution.

<sup>\*</sup>A., B., G., H., I.A., O., T. and Z. denote Anthropology, Botany, Geology, History, Industrial Arts, Ornithology, Transportation and Zoology.

Nothing issued in departments indicated by dagger during year ending September 30 1901.

The LIBRARY.—During the year there have been added to the library 1,461 volumes and 2,462 pamphlets, making the total number of accessions 28,272. The growth of the library has been greater this year, chiefly owing to the fact that the most important scientific institutions now readily respond with their publications in exchange for the Museum series. An indication of its growth is illustrated by the fact that the accommodation for the card catalogue has had to be substantially increased. The cataloguing is kept up to date and all the catalogues are being revised. Attention should be drawn to the fact that a number of publishers have placed the Museum on the free list of their journals, in exchange for its publications—another evidence of the appreciation in which the institution and its work are held. An inventory is now being taken of all books and pamphlets in the library.

Among the gifts, special mention should be made of those received from the Biblioteca Nacional, Santiago de Chile; Boston Museum of Fine Arts; New York Botanical Gardens; Pennsylvania State Library; Duc de Loubat, Paris, France; and George Watt, M. B., Calcutta, India.

The volumes and pamphlets in the Library are distributed as follows:

				Books.	Pamphlets.
General Library,				9,359	12,844
Department of Anthropology,				243	90
Department of Botany,				438	214
Department of Geology,					2,819
Department of Ornithology,				368	
Department of Zoology,				284	

THE RECORDS.—The system of recording accessions and inventorying specimens still works effectively. The total number of specimens accessioned during the year has been 39,002. Classification of the accessions follows:

						Ac	cessions.	Specimens.
Gifts,							170	15,608
Loans,								270
Exchanges,							54	4,073
Collected, .								14,443
Purchased,								4,068
							331	39,002

DEPARTMENTAL CATALOGUING, INVENTORYING AND LABELING. - The work of cataloguing in the Department of Anthropology has proceeded as usual during the year. The more important collections which have been catalogued are those which have been made by Assistant Curator Simms in Arizona, by Curator Dorsey in Oklahoma. the Wyman Collection, and the collection of Caldera, Chili, presented by Mr. Cyrus H. McCormick. The services of Prof. Tarbell of the University of Chicago, were secured by special arrangement and he has devoted a large amount of time to the preparation of labels for the collections in the north court, illustrative of the Archaeology of Europe. The number of labels printed for the department has been smaller than in previous years, this being due to the fact that the work in the printing office has recently so increased as to overtax its ca; acity All specimens received during the year in the Department of Geology have been promptly numbered and catalogued and any available data regarding them preserved. It is satisfactory to know that the Curator reports that records are now on file for all specimens in the Department. The entries in the inventory books of the Department of Zoology number more than in any previous year, so that the books of this Department are now in a very satisfactory state. A number of cards have also been added to the index and it may be safely stated that the clerical work this year has had more attention than usual and that the recording of material has kept pace with the receipt of new acquisitions. The inventory books in the Depart. ment of Botany are in a highly satisfactory condition, the number of specimens entered being over 19,000 for the year. The year's work in the Museum on catalogues and inventories is shown in detail as follows:

DEFARTMENT.		K	vo. of ecord ooks.	Total No. of Entries to Sept. 30, 1901.	Entries during	Total No. of Cards Written.

Zoology,			20	23,092	1,922	12,100

Accessions.—There continues to be constant growth in material in the various departments through purchases and the results of field work. In many cases collections and specimens have been presented to the Museum. Notably was this the case in the acquisition by the Department of Anthropology of the Wattron collection,

obtained through the liberality of Mr. Stanley McCormick. collection comprises nearly 3,000 specimens from certain important Hopi and Zuni ruins, and with the specimens secured by previous expeditions made possible through Mr. McCormick's generosity, has placed the Department in possession of between 7,000 and 8,000 pieces of pre-historic pottery. Other important accessions in this department have resulted from several expeditions in the field: Mr. Newcombe among the Haida Indians, Mr Miller among the tribes of the Shahaptian stock, Mr. Hudson in California, Assistant Curator Simms among tribes of the Puman and Yuman stock, Assistant Curator Owen among the Apache and Navajo tribes, and Curator Dorsey among the Osage, Pawnee and Wichita tribes. A valuable collection of over 200 sets of games of the North American Indians has been added, as well as also eight buffalo shields, the latter being secured by exchange with the National Museum. In addition to these very large collections, certain other accessions are deserving of mention. Chief among the purchases of the year is that of the collection comprising about 300 copper implements and about goo stone implements from Wisconsin and six well-authenticated and well-preserved wampum treaty belts; also, by purchase from Mr. Wyman, were obtained two very handsome buckskin suits, secured by the artist, Mayer, in 1864, from the Sioux, in Western Minnesota. These suits are of the highest interest and value on account of their age and excellent state of preservation. Two other old Klamath suits of buckskin, believed to be the only suits of that reservation, were also secured by purchase. A small but interesting collection illustrating certain phases of the life of the Winnebago Indians of Wisconsin was purchased from Mr. T. R. Roddy. Another interesting acquisition was that of two Zuni shields, pictured by Mr. Cushing in the Second Report of the Bureau of Ethnology, and described by him as the "Fetiches of the Priesthood of the War Bow," a Zuni esoteric society. The shields were among the most sacred possessions of the Zuni and were acquired by purchase from a dealer. An exchange with the National Museum enabled the Museum to obtain eight buffalo shields of the highest value to the collection. It may be of interest to note in connection with the two acquisitions of shields above mentioned, that the Curator of the Department secured during the summer from one tribe seventeen shields, and that Assistant Curator Owen secured two from another tribe, so that the Museum is now in possession of nearly forty of these important and characteristic objects of the Plains Indians. The Division of Somatology secured by exchange with Mr. David Boyle, of the Archæological Museum, Toronto, an invaluable collection

of over fifty skulls of the early Hurons of Ontario. These form a most valuable addition to the already extensive collection of osteological material from that country. By purchase twelve additional specimens of carved Papuan crania were secured. Further material of this nature was also secured from the University of Pennsylvania by exchange; from Mr. Fred Harvey, by gift; while the amount secured by expeditions in the field was unusually large. From the Paris Exposition of 1900 about 1,200 specimens of ores and minerals were received and added to the collections in the Department of Geology. These included a complete series of zinc ores of the United States, gold and silver ores from a number of mines of the Western and Southern States, a nearly complete series of iron ores of the United States, mercury ores from the United States and Russia, etc. A number of bones of the Mastodon were obtained from Morocco, Ind. Three falls have been added to the meteorite collection by purchase. The work in the dinosaur quarries in western Colorado was the means of adding a large quantity of material. As usual the most valuable accessions in the Department of Zoology were obtained by collectors in the field, making it possible for the Curator to obtain reliable data regarding each specimen. Several specimens were, however, added by purchase. The gift of Messrs. Kennedy and Stevenson of a group of Mexican deer and the purchase of a number of species of African antelope now nearly extinct must be considered important. A fine specimen, with the skeleton, of a sea lion sixteen feet in length was also secured. The dispatching of Assistant Curator Meek to Mexico in the spring of the year resulted in the adding of over 5,000 lethyological specimens. A report of this expedition is being prepared for publication. Over 8,000 entomological specimens were presented to the Museum during the year and 683 were collected in the field. The notable additions to the Department of Botany are as follows 505 European specimens, 136 Oregon specimens, 417 plants collected by the Curator in Jamaica, 416 St. Croix plants, 1,176 Illinois and Indiana plants collected and arranged by Prof. Umbach, 214 Natal plants received from the Botanical Gardens of Natal, etc. Much economic material has also been received and added to this department, chiefly by gift, and the display contemplated in the galleries during the next year will, it is anticipated, attract considerable attention.

EXCHANGES. It is of the highest importance that this system of acquiring material be extended, as it undoubtedly engenders concurrent effort in the scientific field. Collectors in the field naturally obtain much duplicate material, and if it was so desired several indi-

OSAGE SHIELDS OF BUFFALO HIDE, WITH OUTER AND INNER DECORATED COVERS OF BUCKSKIN- FIELD COLUMBIAN MUSEU''.

vidual collections might be prepared with very little extra effort, for exchange with institutions who would respond in the same manner. Exchange relations have been opened this year with several new institutions and individuals, both abroad and at home, to the mutual satisfaction of the parties concerned.

**EXPEDITIONS AND FIELD WORK.**—The number of expeditions in the field this year outnumbered any sent out in previous years. The complete list indicates the gentlemen who had charge of the expeditions, the localities they visited, and the material they obtained:

Locality.	Collectors.	Material.
Jamaica, West Indies	C. F. Millspaugh,	Photographic and Plant material.
Southern Illinois,	W. A. Phillips,	Quarry, Shop and Mound Collections of Archæolog- ical material.
Arizona and California, .	S. C. Simms,	Ethnological Collections from Tribes of the Piman and Yuman Stocks.
California,	J. W. Hudson,	Ethnological Collections from Tribes of the Mariposan and Maquelumman Stocks.
Central Mexico,	S. E. Meek and F. E. Lutz,	Reptiles, Fishes, Mammals and Insects.
Western Colorado,	E. S. Riggs,	Dinosaurs.
Arizona,	,	
	McCormick Exped'n),	Archæological Collection from Prehistoric Hopi Graves in Ruins of Walpi and Mishongnovi.
Hopi, Arizona,	Geo. A. Dorsey (Stanley McCormick Exped'n),	Ethnological Collection.
Southern Illinois,	W. A. Phillips,	Archæological material from Cobden, Ill., and Hot Springs. Ark.
Columbia River Basin, .	Merton L. Miller,	Ethnological and Archæological Collections from Shahaptian Tribes.
Queen Charlotte Islands,		
	C. F. Newcombe,	Totem Poles, Grave Carvings, Skeletons and General Haida Ethnology.
Apache and Navajo In-	Chas. L. Owen,	Ethnological Collection.
		Ethnological Collections
	Geo. II. Doisey,	from Osage, Pawnee and Wichita Indians

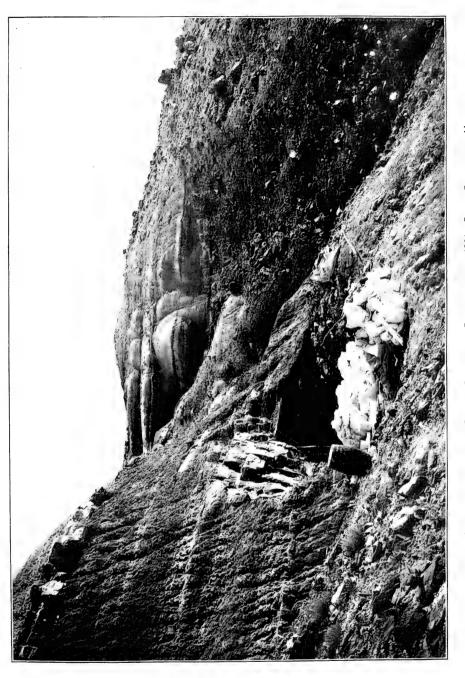

In the last Report mention was made of the expedition of Assistant Cirati: Owen among the Hopi, through the generosity of Mr. Stanley McCormick. The expedition returned in November after a most successful summer's work, during which time eight ruins were visited, all of which yielded large collections of the highest interest and value. Mr. McCormick's further interest in this work made possible its continuation this spring, with the result that a large amount of material was obtained from the ruins of old Walpi and Mishongnovi, the specimens secured from the former ruin numbering about two thousand, amongst which were hundreds of bahos or prayer sticks, painted stoneslabs, effigies, and many forms of pottery new to science, both in their form and decoration. Objects illustrative of the religious life of the Hopi, of which probably the most interesting was the reredos of the altar of the Drab Flute Society of Mishongnovi, were procured on this expedition. Two months' collecting of Ethnological specimens from the White Mountain Apache and Navajo resulted in the acquisition of over five hundred objects illustrating the daily and religious life of the tribes mentioned. Early in January of this year Assistant Curator Simms was dispatched to Arizona where he remained three months, pursuing ethnological investigations among the various tribes of the Piman and Yuman stocks. Owing to the fact that these tribes had not been previously represented in the collections of the Museum to any considerable extent, the material and information obtained by Mr. Simms are of unusual value. During the past year J. W. Hudson became associated with the Department of Anthropology and was assigned to work in California. His work will continue through this and the following year, and will have for its object the careful study of certain little-known tribes. An extremely large collection, embracing many categories of objects of the tribes of the region that he has thus far visited, has already been catalogued and accessioned. It is also highly probable that as a result of his investigations much new light will be thrown upon many heretofore obscure problems of the ethnology of this region. During the five summer months M. L. Miller, from the University of Chicago, investigated for the department certain Shahaptian tribes of the Columbia River basin. This region was practically unrepresented in the collections of the Museum, and as a result of Mr. Miller's work a very large collection of the highest interest and value has been secured, thus filling an important gap in the collections illustrating the Ethnology of North America. The department has also secured many valuable specimens from the Haida Indians of the Queen Charlotte Islands, through an

arrangement with C. F. Newcombe of Victoria. A large number of skeletons, skulls and general ethnological material secured in this region is of exceptional interest. An extremely large totem pole, a finely carved interior house-post, a large memorial column and many carvings from shaman's graves must also be noted. Mr. Phillips, of Evanston, again visited southern Illinois for the purpose of continuing his investigations in aboriginal quarry shops. He was also enabled to secure specimens from the novaculite quarries in Arkansas which will make more complete the series from this locality already in possession of the Museum. Mr. Millspaugh, Curator of the Department of Botany, visited Jamaica, West Indies, with the result that a large number of photographs and notes of tropic fruit culture were obtained, and a small but valuable series of plants collected. Working of the dinosaur quarries in Colorado, which were discovered and partially exploited a year ago, was continued during several months of the summer by a party under the direction of Assistant Curator Riggs. A large quantity of remains was obtained which belonged to a single individual of the genus Brontosaurus. secured are as follows: Eleven presacral. The remains five sacral and twenty-three caudal vertebræ, all in series; one femur, one ilium, two pubes, two ischia, fifteen ribs and numerous chevrons and small bones. All these bones are in an excellent state of preservation and when cleaned and mounted will make an impressive and instructive display. The work of securing them involved considerable blasting, tunneling and the construction of a temporary ferry. In addition to the above, several specimens of fossil insects were obtained and about sixty-five excellent negatives giving landscape and quarry views of the region were made. Grateful acknowledgments are due the officials of the Chicago, Burlington & Ouincy and the Denver & Rio Grande Railroads for assistance in the work of this expedition. Mr. Surber, the regular collector in the Department of Zoology, resigned in the early spring and Mr. Edmund Heller was engaged to succeed him. He is now at work on the Pacific coast, where he has been unusually successful, having in a short space of time added a number of species not represented in the collections. The visit of Mr. Meek, accompanied by a volunteer assistant, to Southern Mexico for the purpose of collecting mammals, fishes, reptiles and insects, was highly important. The collection of fishes obtained was naturally the largest and most important from a scientific standpoint, as it will furnish more material to work out the geographical range of the North American forms which are found in Southern Mexico, and

the limit of South American fishes which are found in Central America and which go north into Southern Mexico, that has been collected in that country. A large amount of duplicate material, valuable for exchange, was also secured. Six hundred and eight specimens of reptiles were added to the collections during the past year, nearly all of which were procured in the field.

INSTALLATION, REARRANGEMENT AND PERMANENT IMPROVEMENT. - More repairs and alterations to and around the building have been made during the past year than any in the history of the institution. The renewal of the building foundations has been continued and is complete with the exception of those in the east annex, which will be finished by the end of December. The floors of the east and west entrances to the main building have been entirely taken up and rebuilt with brick, iron and concrete. The exterior of the building still demands constant attention and the plastering done a year ago had to be entirely renewed. The repairs to the roof are maintained and this year the entire area was given a coat of paint. The alterations in the building have been more extensive than in any previous year. The photographic gallery has been enlarged, as also the printing office, and a new office provided for the Curator of Botany on the first gallery. The Librarian's office was completely renovated, the walls calcimined, and a hardwood floor laid. More light was demanded and a window was opened in the west wall. Additional light and ventilation were also provided in the sleeping room of the firemen. An unusually large number of cases have been built and several old cases ebonized and mahoganized, so that there are now comparatively few of what might be termed "World's Fair" cases in the building.

The removal of the textile collections, formerly occupying Halls 30 and 31, was completed during the year, the halls repainted and collections illustrating the Ethnology of South America installed therein. Halls 14 and 15, which contained the latter collections, were utilized to exhibit newly acquired material. The complete reorganization of Ayer Hall and the removal of all collections which did not pertain to the Plains Indians was a noteworthy feature of the year. The entire hall was painted and forty new cases provided in which were installed collections illustrating the tribes of the Siouan, Algonquin, and allied stocks. The series of Catlin paintings were reframed and placed on the north wall, thus further augmenting the attractiveness of the hall. The Ayer collection from the northwest coast was installed in six new cases in Hall 11, thus completing the installation of the halls devoted to this region. Hall O, formerly the office of the curator of the

DINOSAUR QUARRY NO. 15-NEAR FRUITA, COLORADO-EXPEDITION OF 1901-FIELD COLUMBIAN MUSEUM.

department, having been placed in order, was occupied for the first time this year by a collection illustrating the games of the North American Indians. In Hall 8 were placed seventeen large upright cases and in these the Wattron collection and portions of the collections secured by Assistant Curator Owen were installed. The collection of relics from the Swiss Lake dwellings, presented by the Vice-President, as noted in the last Report, was placed in new cases in an alcove in the North Court, where it forms a valuable addition to the Archæological collections of Europe. The collection secured by Assistant Curator Simms from the tribes of the Paiman and Yuman stocks was identified and labeled and now occupies Hall 15. An ethnological group of six figures, illustrating the more important domestic activities of the Puget Sound Indians, was completed and placed on exhibition.

The Curator of the Department of Zoology reports that several of the divisions are exceedingly cramped for room and that further installation of specimens in these divisions will be difficult. The overhauling and re-installation of the Conchological collections has been completed so that they now occupy thirty-two table cases, all identified and labeled. A striking group of the northern Wart Hog was placed on exhibition in the West Court and has already attracted much attention. In other divisions of Zoology, more attention has been paid to the study collections, which are all in a highly meritorious and accessible condition.

In order that a systematic re-installation of the large economic collections might be pushed and augmented, and this valuable material, which has only had a geographic installation since the opening of the Museum, might be brought into a more fitting condition, two new office rooms for the Curator of Botany and his assistant have been built upon the main gallery and types of three styles of cases, designed for economic installation, viz.: (1) wall cases, (2) floor cases and (3) table cases. Two floor cases and twelve wall cases have been built, and fourteen more are in process of construction. The time of the Curator since the first of May has been employed in filling gaps in various groups of economic material, writing descriptive labels and installing in monographic completeness such material as it has been possible to acquire. The cases finished to date are: The utilization of cocoanut fiber (2 cases); licorice and vegetable waxes (½ case); the destructive distillation of wood (1/2 case); the utilization of pine needle fiber (1 case); the utilization of cork (2 cases); Paraguay and Japan tea (1 case); Indian corn (1 case). Several others are brought near to completion. Several entirely unique designs in graphic

labels and specimen mounts have been devised and will be incorporated in the installation during the coming year.

In Hall 65, devoted to structural geology, an exhibit of cave formations and cave life has been prepared. Stalactites, stalagmites and other cave formations from several well known caves of the United States have been mounted in their natural position and a realistic setting corresponding in form and details to a typical limestone cave, given Accessories illustrating water, and animals which live in caves, such as bats, blind fish, crayfish and crickets are also used. The whole illustrates the nature and manner of growth of limestone cave formations and the living forms which characterize such caves. Owing to the darkness of the interior of the case from its being enclosed on all but one side, electric lights are used to illuminate the interior. The other cases in the same hall have been fined and repainted, the specimens thoroughly cleaned and reinstalled. A case containing a collection of claystones has been added. About half the cases containing the systematic mineral collection have also been lined and painted, the specimens cleaned, carefully residentified and resinstalled. The Chalmers crystal collection received from exhibition at the Paris Exposition has been installed in Hail 64. The work of transferring the invertebrate tossils to the mounts of manila board described in a previous report has been continued, in preparation for removal of the collection to new cases now in process of construction. A foreleg, complete with the exception of a few foot bones and including the shoulder girdle, of the large dinosaur Merosaurus, has been mounted and installed in Hall 36. A femur and humerus of Camarasaurus, which are the largest dinosaur bones ever discovered, together with several vertebræ and a rib of the same animal have also been placed in this hall. These specimens are of especially high scientific value and interest. The collections in Hall 79, devoted to ones of the base metals, have been completely re-installed. The old cases were removed and new cases, purchased in part from the United States Commission to the Paris Exposition, substituted. These cases are constructed of mahogany and plate glass and represent a permanent style of instal-The types of cases employed are three, a wall case, a flat floor case and an upright floor case. The wall cases are twelve feet long and seven feet high. The upper portion of the case, designed for the exhibition of smaller specimens, is ten inches deep and is fitted with five slanting shelves. Specimens installed on these shelves are mounted on mahogany blocks beveled to make a level support, to the front of which the label is attached. It is found

OCT. 1901.

that the use of a sloping shelf and a beveled block gives the specimens an improved perspective, which could not be gained by a level The lower portion of the case has a projecting slant front supported by turned posts and is designed for the exhibition of larger specimens. The flat and upright cases are designed for the exhibition of the heaviest and largest ore specimens. The flat cases are six feet long, four feet wide and four feet high; the upright cases four feet square and six feet six inches high. They rest on heavy turned legs, which raise the base of the case two feet from the floor. The cases are lined with Pompeian red burlap. An upright hexagonal case with central pyramid is used for the exhibition of the most showy specimens of copper ore. The collections illustrating the metallurgy of iron, formerly occupying Hall 76, have been entirely removed, as they were somewhat foreign to the present scope of the Museum and the room was needed for other purposes. Collections and cases were presented to the Armour Institute of this city. In their place will be put the collections illustrating geographic geology, which include relief maps, globes and other geographic material, and the space in Halls 60 and 61, formerly devoted to their exhibition, will be used to accommodate the expanding paleontological collections. Considerable additions have been made to the collections of ores of the precious metals, largely through material received from the Paris Exposition. The exhibition of this material has been provided for by the addition of one new wall case and by the installation of four cases of ores in the west dome. The interiors of the upright floor cases in Hall 72 have been repainted, the specimens cleaned, re-identified and mounted on beveled imitation mahogany blocks.

PHOTOGRAPHY, ILLUSTRATION AND PRINTING.—Each of these divisions reports unusual progress, both as regards equipment and work accomplished. The addition of more floor space to the printing office has made it possible to increase the staff, which was recently done. The employment of an artist in the division of illustration must be noted with satisfaction, being an acquisition which had been much needed. The following tables show the work performed by these important divisions:

TAXIDERMY.—Work in this division has been unusually active, and results of the very highest character have been attained. New methods in mounting specimens have been adopted and in consequence a perfection of work never before attained has been secured. Five large groups are nearing completion, one of zebra and four of the Virginia deer in spring, summer, autumn and winter, this last distinguished by a wealth of accessories and detail never before attempted in this class of work.

BEQUEST.—The sum of \$1,000.00 was bequeathed to the Museum by the late Huntington W. Jackson. This brings to mind the fact that the President during the year supported the movement to amend the law regarding the Inheritance Tax, and the Museum is to be congratulated on the success with which the concerted efforts of the various institutions in the country has been crowned, the objectionable law having been repealed by the United States and the State of Illinois.

ATTENDANCE.—A falling off in the total attendance for the year has to be reported. The figures show a difference of 18,491 in favor of the year ending September 30, 1900, over the year ending September 30, 1901. More than half of this decrease occurs in the month of September, 1901, when the attendance was 9,782 less than in the same month of the previous year. The only explanation of this large difference is in the fact that the weather was inclement on three out of the nine free days of the month. The marked decrease in the paid attendance is explained by the fact that during the previous year the visit of the G. A. R. to Chicago brought a great many strangers to the city, who visited the Museum in large numbers, in fact, the paid attendance during the week of the encampment was 4,500 more than the

average. It is encouraging in view of this diminution to note that the attendance of scholars and teachers is the largest in the history of the Museum, being over 1,500 in excess of any previous year. During the year 222 classes comprising 6,225 pupils have studied the collections. Of these classes, 11 were from outside the city and the remaining 211 were from the city. Appended is a list of classes, thirty or more, that visited the Museum during the year just closed. A comparison between the daily attendance for the year ending September 30, 1900 and the year ending September 30, 1901 is also given.

I, G. R. MITCHELL, a NOTARY PUBLIC in and for said County, do hereby certify that the foregoing petitioners personally appeared before me and acknowledged severally that they signed the foregoing petition as their free and voluntary act for the uses and purposes therein set forth.

Given under my hand and notarial seal this 14th day of September, 1893.

G. R. MITCHELL,

[SEAL]

NOTARY PUBLIC, COOK COUNTY, ILL.

# CHANGE OF NAME.

Pursuant to a resolution passed at a meeting of the corporate members held the 25th day of June, 1894, the name of the COLUMBIAN MUSEUM was changed to FIELD COLUMBIAN MUSEUM. A certificate to this effect was filed June 26th, 1894, in the office of the Secretary of State for Illinois.

# AMENDED BY-LAWS.

(JANUARY 20, 1900.)

## ARTICLE L

#### MI MBIRS.

Stiction t. Members shall be of five classes, Annual Members, Corporate Members, Life Members, Patrons and Honorary Members.

Si c. 2. Annual members shall consist of such persons as are selected from time to time by the Foard of Trustees at any of its meetings, and who shall pay an annual fee of ten dollars (\$10.00), payable within thirty days after notice of election, and within thirty days after each recurring annual date. The failure of any person to make such initiatory payment and such annual payments within said time shall, at the option of the Board of Trustees, be ground of forfeiture of annual membership.

This said annual membership shall entitle the member to:

First. Free admittance for himself and family to the Museum on any day.

Second. Ten tickets every year admitting the bearer to the Museum on pay days.

Third. Acopy of every publication of the Museum sold at the entrance door, and to the annual reports.

Fourth. Invitations to all receptions, lectures or other entertainments which may be given at the Museum.

Sign 3. The corporate members shall consist of the persons named in the art of the persons of the first vear of members, shall, within ninety days of their respective election, pay into the treasury the sum of twenty dollars (\$20.00) or more. The failure of any person to make such payments within said time shall at the option of the Board of Trustees, be ground for forfeiture of his corporate membership. The annual dues of corporate members shall be five dollars (\$5.00) after the first year of membership, and no one shall exercise the rights of a corporate member until his dues are paid; and a delinquency of six months in the payment of annual dues shall be ground for forfeiture of corporate membership. Corporate Members becoming Life Members, Patrons or Honorary Members shall be exempt from dues.

SEC. 4. Any person paying into the treasury the sum of five hundred dollars at an amount of the shall, apply the informal source of the trusters, become a life member. Life members shall be exempt from all dues.

SEC. 5. Patrons shall be chosen by the Board of Trustees, upon recommendation of the Executive Committee, from among persons who have rendered eminent service to the Museum. They shall be exempt from all dues, and, by virtue of their election as patrons, shall also be corporate members.

SEC. 6. Honorary members shall be chosen from among persons who have rendered eminent service to science, art or mechanics. They shall be chosen by a vote of the Trustees, and only upon unanimous nomination of the Executive Committee. They shall be exempt from all dues. In commemoration of the 14th day of October, honorary members shall not be more than fourteen in number at any one time.

SEC. 7. All members of whatever class shall be eligible to appointment upon committees other than the Executive Committee.

## ARTICLE II.

#### OFFICERS.

SECTION I. The respective members of the Board of Trustees now in office, and those who shall hereafter be elected, shall hold office during life. Vacancies occurring in the Board shall be filled by a majority vote of the remaining members of the Board of Trustees at any regular meeting.

SEC. 2. The other officers shall be President, two Vice-Presidents, Secretary and Treasurer, and an Executive Committee of four persons, who shall be chosen by ballot by the Board of Trustees from their own number as early as practicable after the annual meeting in each year. The President shall be ex-officio a member of the Executive Committee and Chairman thereof, in addition to the other four members. The Secretary and Treasurer may, or may not, be the same person, and the Secretary may, or may not, be a corporate member.

Any officer may be removed at any regular meeting of the Board of Trustees by a vote of two-thirds of all the members of the Board. Vacancies in any office

may be filled by the Board at any meeting.

SEC. 3. The President shall appoint from among the Trustees a Committee on Finance, a Committee on Property, an Auditing Committee, and a Committee on Buildings and Grounds, who shall serve during the pleasure of the Board.

SEC. 4. The officers shall perform such duties as ordinarily appertain to their respective offices, and such other duties as the Board of Trustees may from time to time devolve upon them. The Treasurer shall give bond in such amount and with such surety as shall be approved by the Executive Committee, and shall disburse the funds of the Museum only in accordance with the directions of the Executive Committee, upon the signature and counter-signature of such officers as the Executive Committee shall empower thereto.

SEC. 5. The Executive Committee shall have full control of the affairs of the Museum, under the general supervision of the Board of Trustees.

### ARTICLE III.

#### MEETINGS.

SECTION I. In commemoration of the discovery of America by Christopher Columbus, the annual meeting of the corporate members shall be held on the 14th day of October in each year, except when that day falls on a Sunday, and then

upon the Moraday following. At such meetings the corporate members shall transact such hoisiness as may properly come before the meeting. Special meetings of the corporate members shall be called at any time by the Secretary upon written request of twenty corporate members. In such case, thirty days' notice by mail shall be given to corporate members of the time, place and purpose of such meetings.

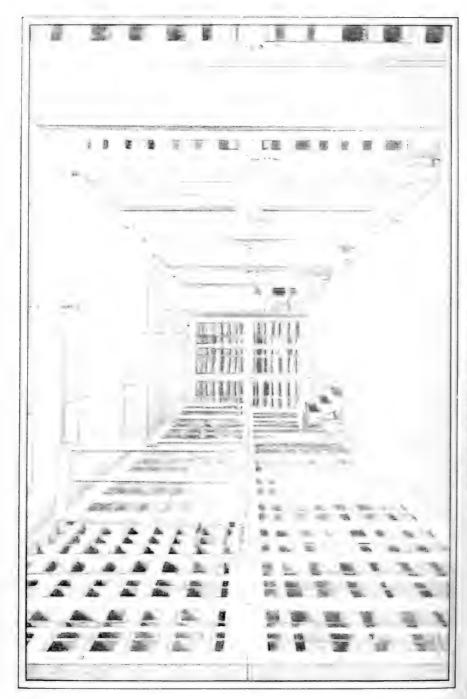

Si c. 2. Regular meetings of the Board of Trustees shall be held upon the 14th day of October, except when that day falls on a Sunday, and then upon the Menday following, and upon the last Monday of January, April and July of each year. Special meetings may be called by the President at any time upon reasonable notice by mail, and shall be called upon the written request of three Trustees. I ive Trustees shall constitute a quorum, but meetings may be adjourned by any less number from day to day or to a day fixed.

#### ARTICLE IV.

#### AMI SDMENTS.

SECTION 1. These By-Laws may be amended at any regular meeting of the Trustees by a two-thirds vote of all the members present, provided the amendment shall have been proposed at the last regular meeting preceding, or shall be recommended by the Executive Committee.
